

RE: xm radio and the First Amendment
To Whom it May Concern,

It absolutely continues to amaze me that with the state of our country that our elected officials continue to boondoggle and waste precious time and resources on such trivial things!

Please refocus on the bigger issues!! Oh, say like gas prices, mass transit, highway repair and expansion....hey!! How about improving airport security?!? Get out of my and xmradio's FIRST AMENDMENT RIGHTS!!!

Our world is shrinking and technology is rapidly improving as a result of OUR, THE GENERAL PUBLIC'S demand--and do not forget--we are also the VOTING PUBLIC, we want and are paying for services which we feel are GREAT!!

If you restrict xmradio today, then what will be next?!? We all have choices in life and if I am sick of listening to 22 minutes of commercials an hour and non stop babbling on commercial radio--and NEED the traffic and weather WHEN I NEED the information--I am going to gravitate to companies who will provide me with good and timely information--that is MY CHOICE--and xm is MY choice.

I would like to bet that 100 years ago, the horse and buggy sellers attacked and tried to restrict the first autos...and look where we are now!!

Get off you butts and go do something productive for yourself and YOUR CONSTITUENTS--and feel GOOD about it!!

In the meantime--kindly step aside and leave me, xm, and my First Amendment rights ALONE!!!

Sincerely,

Sarah and William Wilson
